A Guide to Tribes in Indonesia Zulyani Hidayah,2020-04-28 This encyclopedia provides a comprehensive overview of the traditions, cultures, kinship norms, and other significant cultural aspects of the tribes, or otherwise named ethnic groups, of Indonesia, by an Indonesian anthropologist. The entries are supported by illustrations drawn by the late author himself, and are also accompanied by maps indicating the geographic locations and distributions of each tribe throughout the vast archipelago. Originally written and published in Bahasa Indonesian, the text has been translated into English and revised to feature up-to-date information. In showcasing the extent of diversity and the distinctiveness of the numerous tribal cultures in Indonesia, the volume presents itself as an important academic reference in Indonesian anthropology and ethnography studies, now finally available to global readership. Intended as a short work of reference, it will be indispensable to students and scholars researching Indonesia from anthropological, sociocultural, and ethnographic perspectives.

The Optical Unconscious Rosalind E. Krauss,1994-07-25 The Optical Unconscious is a pointed protest against the official story of modernism and against the critical tradition that attempted to define modern art according to certain sacred commandments and self-fulfilling truths. The account of modernism presented here challenges the vaunted principle of vision itself. And it is a very different story than we have ever read, not only because its insurgent plot and characters rise from below the calm surface of the known and law-like field of modernist painting, but because the voice is unlike anything we have heard before. Just as the artists of the optical unconscious assaulted the idea of autonomy and visual mastery, Rosalind Krauss abandons the historian's voice of objective detachment and forges a new style of writing in this book: art history that insinuates diary and art theory, and that has the gait and tone of fiction. The Optical Unconscious will be deeply vexing to modernism's standard-bearers, and to readers who have accepted the foundational principles on which their aesthetic is based. Krauss also gives us the story that Alfred Barr, Meyer Shapiro, and Clement Greenberg repressed, the story of a small, disparate group of artists who defied modernism's most cherished self-descriptions, giving rise to an unruly, disruptive force that persistently haunted the field of modernism from the 1920s to the 1950s and continues to disrupt it today. In order

to understand why modernism had to repress the optical unconscious, Krauss eavesdrops on Roger Fry in the salons of Bloomsbury, and spies on the toddler John Ruskin as he amuses himself with the patterns of a rug; we find her in the living room of Clement Greenberg as he complains about smart Jewish girls with their typewriters in the 1960s, and in colloquy with Michael Fried about Frank Stella's love of baseball. Along the way, there are also narrative encounters with Freud, Jacques Lacan, Georges Bataille, Roger Caillois, Gilles Deleuze, and Jean-François Lyotard. To embody this optical unconscious, Krauss turns to the pages of Max Ernst's collage novels, to Marcel Duchamp's hypnotic Rotorelief, to Eva Hesse's luminous sculptures, and to Cy Twombly's, Andy Warhol's, and Robert Morris's scandalous decoding of Jackson Pollock's drip pictures as Anti-Form. These artists introduced a new set of values into the field of twentieth-century art, offering ready-made images of obsessional fantasy in place of modernism's intentionality and unexamined compulsions.

Graphite and Precursors Pierre Delhaes, 2000-12-21 Humans first used carbon as chars from firewood in ritual paintings and primitive metallurgical processes. Natural forms of carbon have been known since antiquity, yet the knowledge of the carbon element in chemistry and its technical applications on a larger scale are a relatively recent development. The industrial revolution in Europe two centuries ago led the way to the numerous applications of these graphitic forms that are still used today. Graphite and Precursors features short tutorial articles on different topics related to the science and technology of carbons intended for engineers, students of Materials Science and scientists who are seeking a fundamental understanding without reinventing the wheel. This first volume of the World of Carbon book series focuses on graphite and its precursors, including its origin and various implications. The basic properties of hexagonal graphite are developed, and several theoretical and experimental approaches explain why this crystalline solid is fascinating in solid state physics. Also featured are the numerous applications connected to thermal, mechanical and chemical graphites, as well as their various industrial uses in polycrystalline form. Finally, carbon precursors are introduced.

Linguistic Criticism Roger Fowler, 1986 A particularly fruitful development in literary studies has been the application of ideas drawn from linguistics. Precise analytical methods help the practical criticism of texts, while at the same time the theory of language has illuminated literary theory. Linguistic Criticism is an accessible introduction to this often confusing subject. Fowler sets out clearly and simply a variety of analytical techniques whose application he demonstrates in discussions of a wide range of texts drawn from fiction, poetry, and drama. He concentrates on structures that relate literature to ordinary language, stressing the importance of the reader's everyday language skills. This second edition has

clarified and expanded sections on the role of the reader in literary criticism and includes more twentieth-century texts and examples.

Theorizing Images Žarko Paić, 2016-04-26 This book uncovers an underlying dispute over the role images play in contemporary society and, consequently, over their values and purposes. Two decades after the concepts of the pictorial and the iconic turn changed our vernacular involvement with regard to images, it has become clear that it was not only a newly discovered social, political or sexual construction of the visual field that brought turbulence into disciplinary knowledge, but that images have their own “pictorial logic” with powers exceeding those that are purely iconic or visually discernible. Instead of underscoring previously defined concepts of the picture, the contributors to this book view visual studies and Bildwissenschaft “merely” as a place for the theory of images, making a case for the hotly-debated topic of their powers and weaknesses on the one hand, and of their respective theories on the other. Therefore, as the title indicates, this book theorizes images, but it does not present a theory of images, because visual studies cannot lead to a unified theory of images unless a unified ontology of images can be agreed upon first. Although that would be a different task altogether, all the contributions in this book (in different ways and at different paces), by theorizing images in their aesthetic, historical, media and technological guises, pave the way for the future of visual culture and for the image science that will make this future more comprehensible.

Tavistock Institute Daniel Estulin, 2015-09-14 The real story behind the Tavistock Institute and its network, from a popular conspiracy expert The Tavistock Institute, in Sussex, England, describes itself as a nonprofit charity that applies social science to contemporary issues and problems. But this book posits that it is the world's center for mass brainwashing and social engineering activities. It grew from a somewhat crude beginning at Wellington House into a sophisticated organization that was to shape the destiny of the entire planet, and in the process, change the paradigm of modern society. In this eye-opening work, both the Tavistock network and the methods of brainwashing and psychological warfare are uncovered. With connections to U.S. research institutes, think tanks, and the drug industry, the Tavistock has a large reach, and Tavistock Institute attempts to show that the conspiracy is real, who is behind it, what its final long term objectives are, and how we the people can stop them.

The Pastor's Wife Sabina Wurmbrand, 1989 In 1949, when Soviet propaganda was asserting that free Christian worship was being tolerated behind the Iron Curtain, the Communists arrested Pastor Richard Wurmbrand in Rumania for secret Christian activities. The Pastor's Wife is Sabina Wormbrand's true story of her efforts to get her father released, her

subsequent imprisonment and, above all, her unceasing efforts to help build a Christian underground church in restricted areas around the world. For the truth is that the Communists to this day cannot tolerate genuine Christianity, and are still executing or imprisoning underground Christians. This is the urgent message of The Pastor's Wife.--page 4 of cover.

A Guide to Kenya and Northern Tanzania David F. Horrobin,2012-12-06 East Mrica is rapidly becoming one of the most popular areas in the world among the increasing numbers of travellers who are prepared to venture outside their own continent. To those of us fortunate enough to live here, the reasons for this popularity are quite apparent. Much of the region enjoys an equable climate all the year round with no extremes of either heat or cold and with plenty of sunshine. Scenically the area is one of the most beautiful on earth with a marvellous variety of landscape. The beaches are vast and clean and unspoilt. But the outstanding attractions of East Africa, for most people, are its fascinating peoples and the unparalleled abundance of its wild life. This guide is the first of three planned to cover the whole region of East Mrica. It deals with Kenya and Northern Tanzania. The other guides will deal with Uganda and the rest of Tanzania. Many books have been written about East Africa. They come into four main categories; the magnificent picture books, the geography books, the stories about animals and the detailed technical books on such special aspects as game conservation, bird life, prehistory, or butterflies. None of these is suitable as a practical guide for either the local resident or the average intelligent visitor, who is interested in everything but is not an enthusiastic specialist in any particular subject.
